Site is

Generally flat land w/ structures near water.

Site involves a "Swirling, roiling, billowing substance that is voluminous, external, and encompassing. Various temperatures are manifest here, as well as some relatively motion/chemical smells; site seems to involve extensive fire & flames, producing smoke smells, changes to sooty tastes. No people are present here. Structures seem to be secondary to the site, or even irrelevant."

Approved For Release 2000/08/08 : CIA-RDP96-00789R001700180001-4
